GRIFFING NURSERIES

A black and white photograph of a garden path. The path is a light-colored, winding walkway that leads from the foreground into the background. On the left side of the path, there is a stone pillar topped with a decorative lantern. The garden is filled with various plants, including large, dark-leafed shrubs and numerous small, light-colored flowers. In the background, a large, multi-story building with many windows is visible. The overall scene is a well-maintained garden or nursery.

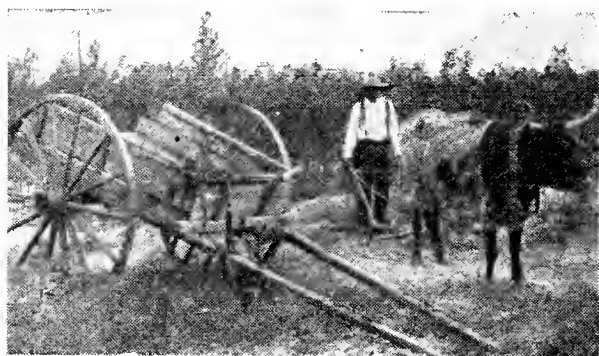

Beaumont, Texas

Griffing Nurseries

Beaumont, Texas

"The Beginning"

Yes, even Griffing Nurseries began with crude methods of operation. Forty-eight years ago the first "Griffing Grown Nursery Stock" was offered to the public. Year by year the Griffing name has been closer associated with TREES, SHRUBS, and PLANTS, always striving for improvement and enlargement.

Griffing's Present Management

The Griffing Nurseries located at Beaumont, Texas is personally managed by its owner, Mr. W. C. Griffing who has spent 30 years in Texas soil in the Nursery industry. During this time he has brought many new introductions to the "PLANT WORLD".

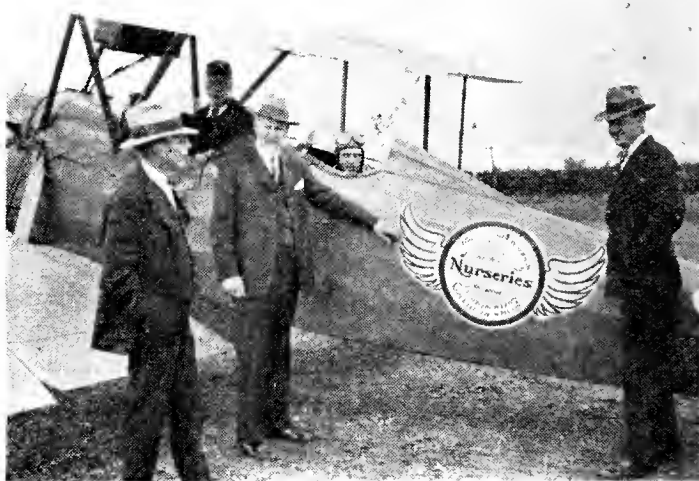

In order to give the Nursery operations his full time and attention, Mr. Griffing lives on the grounds. He is assisted by his son, Ralph C. Griffing who has been associated with the business since 1930.

"Nursery grows to 350 acres"

The policies adopted in the early beginning has enabled the expansion of the Griffing Nurseries until today it includes 350 Acres of choice Evergreens, Pecan and Fruit Trees, Roses, etc., adaptable to the Southwest.

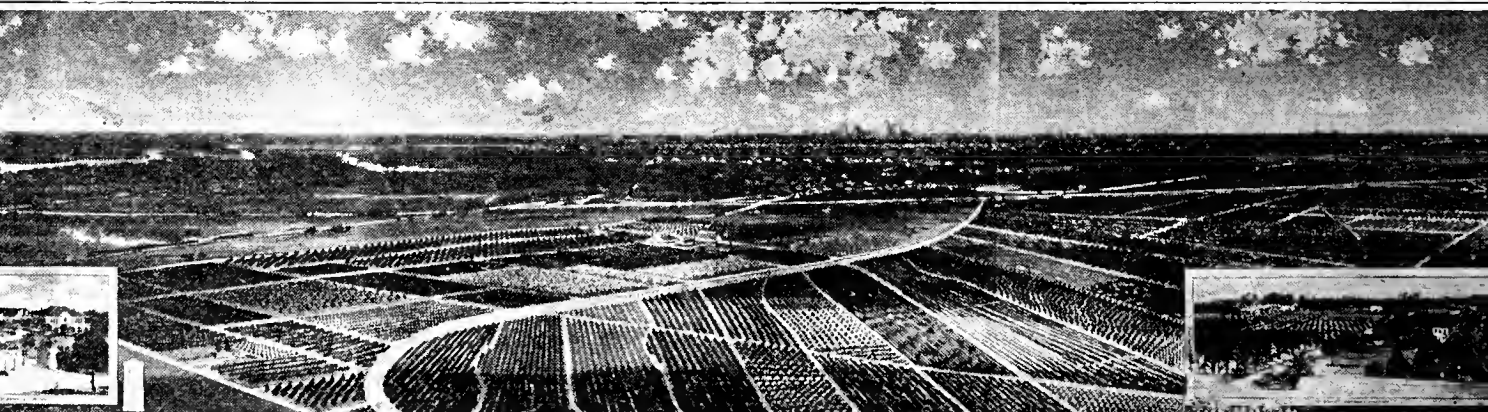

The Griffing's aim is to have the name "GRIFFING" continue to be associated with better TREES and SHRUBS, and serve their wealth of patrons in the most satisfactory manner. With a love of gardening instilled by sturdy Welch parents, the Griffings continue their devoted energies to ever widening the circle of beauty and loveliness of the Southern home.

This brief history is given to offer you full assurance that your orders will have the personal attention of an organization of experienced workers who have devoted a life time to the development of perfecting service, and supplying your Nursery wants.

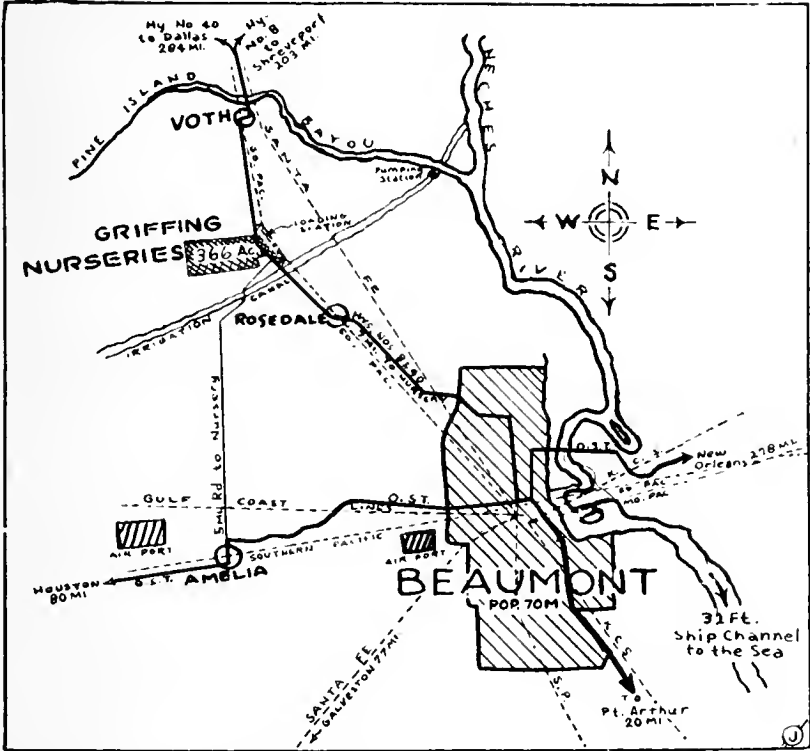

And Now Nursery Stock Can Move
by Aeroplane.

The aerial view shows some of the acreage devoted to the growing of Trees, Shrubby, Roses, etc. The experienced Nursery organization is kept busy in caring for this vast amount of Stock, which is kept cultivated, sprayed, pruned and irrigated.

A partial view of Griffing's 350 Acres of Ornamental Nursery

AN INVITATION TO VISIT OUR NURSERIES

Nursery Location

You will find it a pleasure to visit our Big Nurseries, located near Beaumont, Texas. Drive out to our Nurseries just North of the city on Highway 8 and 40, only 7 miles, across the big Rice canal and you'll see the largest Nurseries in the great Southwest.

It will be well worth your while to make this trip so you can see for yourself how pretty and the Healthy condition of our stock. Our Nurseries, Office, Packing Houses and Loading stations are located conveniently. Be sure to STOP AT THE OFFICE and get a written guide for directions through the Nurseries. You are not obligated to buy. COME AND SEE!

Our Nursery Plant is in a particularly favorable location, isolated from other plantings and free from injurious insect pests and diseases.

Value of Good Baling Soil

Ornamental Evergreens developed a need for Better soils, which led us to select the Nursery location at Rosedale near Beaumont, Texas, where the B&B black heavy soil was found. When GRIFFING'S B&B Trees are used, you can "plant the year 'round". The kind of soil, manner of handling and confidence allows us to do it.

"Griffing Grown Evergreens Grow" has become a regular slogan with us. Our irrigation facilities enables the Nursery stock to be flooded during all seasons of the year, which develops fine fibrous roots, compact growing which can be dug without cutting in Baling. This is much preferred to plants grown in dry soil, where the root system has to hunt moisture and grows longer.

Water After Planting

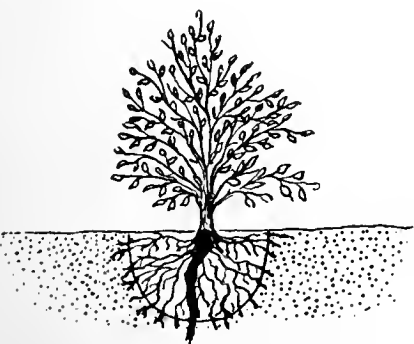

What is B&B & NB?

"B&B" indicates where the Nursery Stock is taken up with the original earth in which it grew, by carefully chiseling away the soil without cracking or crumbling the dirt, which is to remain; then this ball of earth is securely inclosed with strong burlap and pinned with special needle-pointed nails, taking up all the slack in the burlap.

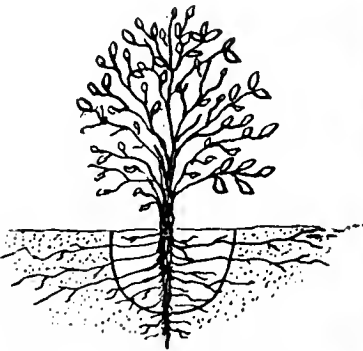

"NB" indicates where stock is dug without dirt on the roots, but puddled for safety in shipping or delivering.

Tying and Pinning with Nails

PLANTS GROWN ON IRRIGATED LAND LOSE 5% OF ROOTS

PLANTS GROWN ON NON-IRRIGATED LAND LOSE 40% OF ROOTS

WE GIVE THE EARTH WITH B&B PLANTS

HOW to ORDER

This Catalog Supersedes and Cancels All Previous Prices
Prices Are Subject to Change Without Notice

TERMS: All accounts payable at Beaumont, Texas. Cash with order unless Terms are arranged prior to shipment.

CHARGE ACCOUNTS: New Accounts gladly opened upon receipt of satisfactory references, (allowing time for investigation). 6% interest charged on all accounts of 30 days or more.

COMPLAINTS: No claim will be entertained as to shortage, undergrade, damaged stock in any way if not reported to us within 3 days after receipt of goods.

GUARANTEE: We exercise all care to have all Stock True to Name; nevertheless, it is understood that should any Stock prove untrue to name, Griffing Nurseries shall be liable only for the Purchase price of the Stock which proves untrue to name, and no greater amount.

INSURANCE: For Purchasers who wish their Trees Insured against Loss from **Natural Causes**, for One Year, we will upon payment of full purchase price, plus **TWENTY (20%) PER CENT** of same, Insure such purchases. Any Loss thus claimed should be reported to us at once.

TRANSPORTATION: We have facilities for shipping by Express, Trucks, Railroads, Steamship and Parcel Post, and will gladly quote you the lowest rates effective to your city. Carload shipments travel at low cost—Column No. 25 applies in Texas, while out-of-state Column No. 32½ applies; besides many special commodity Rates effective. All shipments travel at the risk and expense of the Purchaser.

QUANTITY RATES: When you buy in 10 and 100 lots of (1) B&B Trees, (2) NB Shade Trees and Pecan Trees, (3) Hedge Plants and Berry Vines, (4) NB Fruit Trees and Roses; varieties as grouped can be mixed to apply the quantity rates throughout this Catalog.

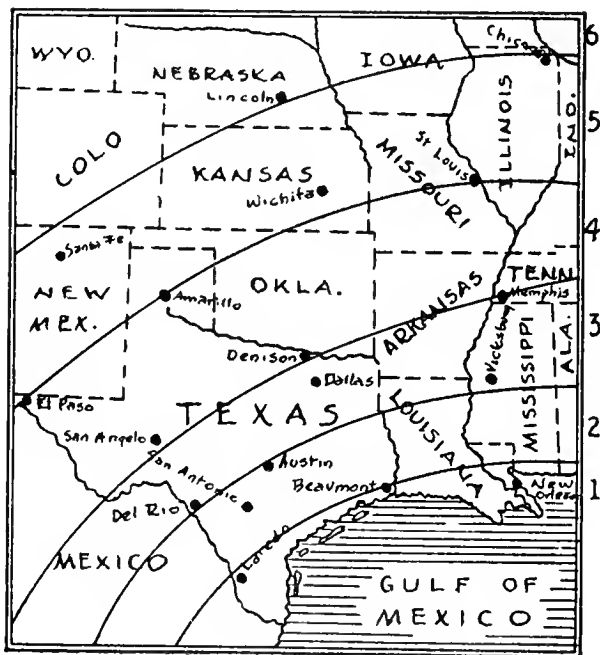

SPECIMEN STOCK selected or marked in the Nursery will be charged for according to its value.

Adaptability Chart

You often admire a certain variety of Tree and wonder if it would grow for you. The Adaptability Chart as prepared shows by the Numbers indicated where stock listed in Catalog is suited.

The Letter "T" being followed by a figure as "T1" means this tree is suited to Territory indicated on the map as No. 1.

Some plants require acid soils, while others require limestone conditions, and for best results special soil preparations are advisable.

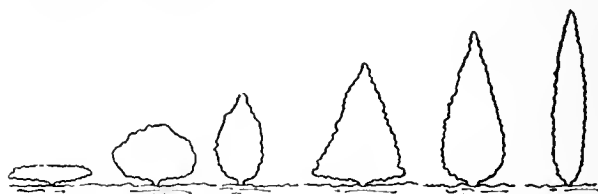

While this map covers only the Southwestern states, the lines could be extended farther East with the same accuracy.

Each variety listed in this Catalog is followed with this Territory designation. The chart is designed to show the temperature the plants will stand under normal conditions, and is usually adaptable for the soil and water conditions. We assume, however, no liability in making these suggestions.

Standardized Grading

For the protection of persons buying Nursery Stock, we follow closely the System of **STANDARDIZED GRADING** of the American Association of Nurserymen. For your convenience in selecting varieties by their manner of growth, we have indicated the Groups into which each variety is classified, the Group No. indicated with each variety.

Coniferous and Broadleaf Evergreens instead of being graded by height alone, are graded by widths of types and forms; and better illustrated below as follows:

No. 1. No. 2. No. 3. No. 4. No. 5. No. 6.

GROUP No. 1—Spreading Type—Evergreens average width of spreading branches both ways.

GROUP No. 2—Semi-spreading Type—Evergreens should be as high as they are wide.

GROUP No. 3—Globe or Dwarf Type—Evergreens 2 ft. high should be 1 ft. wide.

GROUP No. 4—Cone Type—Evergreens 5 ft. high should be 1 ft. wide.

GROUP No. 5—Pyramidal Type—Evergreens 3 ft. high should be 1 ft. wide.

GROUP No. 6—Slender Type—Evergreens 5 ft. high should be 1 ft. wide.

THE MEASUREMENT OF HEIGHT should begin where the branches begin and stop where the main part of the top ends, and not at the top of a thin "shoot".

THE ULTIMATE HEIGHT OR SPREAD of the varieties listed in this Catalog are indicated opposite descriptions, as (10 ft.) same being based on Normal conditions, both soil and climatic.

THE INFLUENCE of BEAUTIFUL GROUNDS

Use Landscape Plans

Should you desire the Services of a competent Landscape Architect to assist you in the proper arrangement of your Trees, Shrubs, and Roses, we will gladly assist you. As we are in direct communication with all leading Architects, perhaps we can refer you to someone in your immediate locality.

Today, the home owner is not satisfied until home grounds are planned and planted with suitable evergreens. This is also true of the School, Library and Courthouse grounds, parks and other Civic grounds.

We will furnish you with a sketch for landscaping your home grounds if you will give us the information as indicated on the sketch below, showing size of lot, location of drives, walks, permanent buildings, trees already on property, etc. For this service a charge of \$5.00 is made, but will be refunded by deduction from your order for \$20.00 or more.

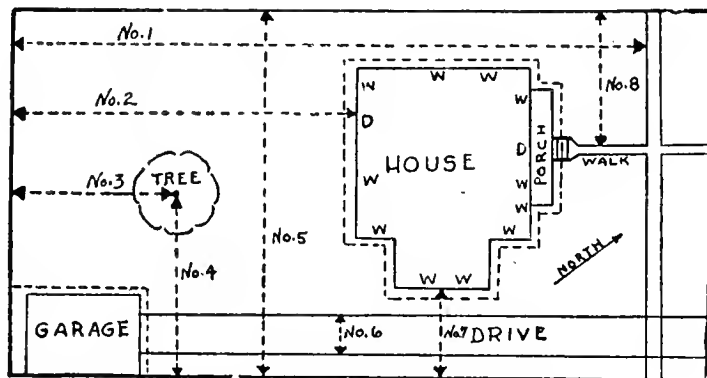

Civilization is measured by the love of the Artistic.

In the highly civilized countries of the old world such as France, Italy and England, one of the outstanding characteristic qualities of even the Peasant home is the love of Beauty. The yard is a riot of blooming plants and vernal Evergreens.

Year by year there is a marked increase among the home owners of America of those who appreciate the moral and social value of appropriate planting of the home grounds.

When you plan your home, remember the proper planting of the grounds is a necessary part of your home plan.

You'll find few diversions more delightful than the simple acts of planting and caring for your plantings. If you have not already, now is the time to plant those varieties that you have envied for so long. Spend your leisure time in your Garden, it will bring sunshine and happiness to your home.

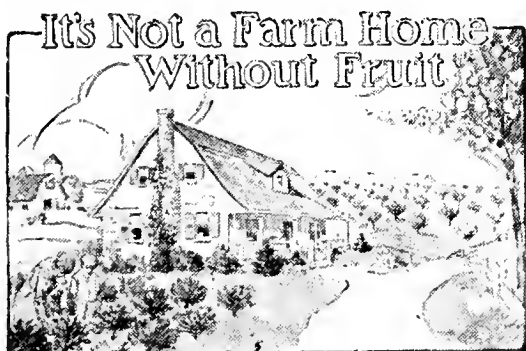

FRUIT TREES for BEAUTY and PROFIT

"Fresh Fruits are Luscious"

"Grow your own fruit" has become a popular slogan. And there is no excuse for failing to have a few trees bearing Peaches, Plums, Pears, Figs, and Grapes in every yard. They make splendid Shade in the back yard and provide Fruit that would have to be bought and usually at high prices.

A small assortment of fruit trees can find room on even a small lot, and will provide a continuous supply of varieties.

Back to the Farm

Little productive Farms may be no larger than a City Lot. Plant Fruit trees that will bear something to eat — fresh or canned. GRIFFING'S TREES ARE FRUITFUL. Buy and PLANT TREES, SHRUBS, and SEEDS. Learn to LIVE AT HOME!

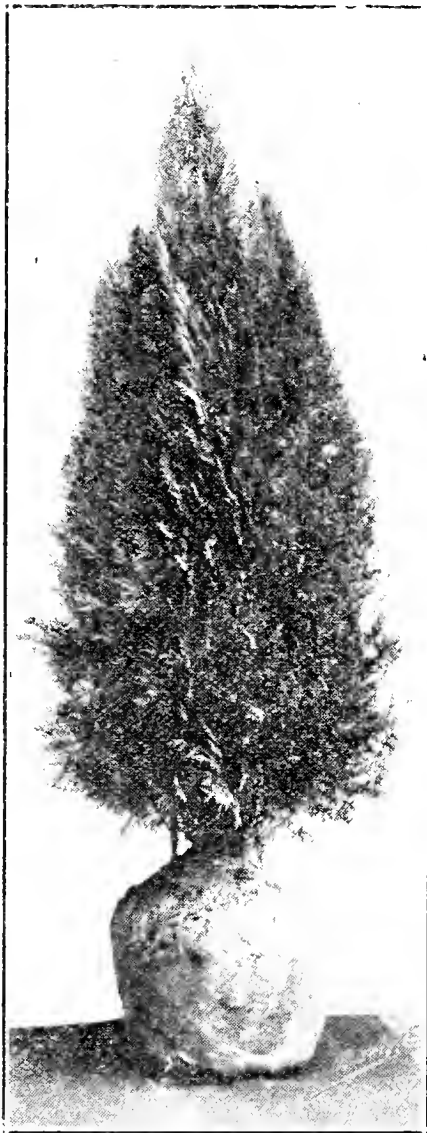

FREE! PECAN BULLETIN

Learn how to grow Pecan Trees profitably. Send for Special Bulletin No. 66 on Planting Pecan Trees.

CONIFEROUS EVERGREENS

Needle-leaved and cone-bearing trees, including many varieties, among which are the Arborvitae, Cypressess, Cedars, Junipers and Pines. Conifers when properly placed add more distinction as well as age and beauty to a planting. Their growth is so slow that they never outgrow their places. The lower limbs of Conifers should always be allowed to remain, for in removing them, the natural beauty is destroyed.

ARBORVITAE

Many people prefer Arborvitae on account of their formal, symmetrical shapes and as they are such varying types, even as to shape and color, they make groupings for various locations so that they are indispensable as there is some kind suitable for every Landscape use.

There are two types of Arborvitae known as Occidental and Oriental. The Occidentals are generally not suited for Southern States, while the Oriental, or Chinese types all do well in the South. The Oriental type is also classed as (Biota) which is now unapproved.

BEVERLY GOLDEN

T. or. beverlyensis

Group 4—Cone Type. 30 ft. T4.

Tall grower. New growth has golden yellow color.

CALIFORNIA GOLDEN

T. or. conspicua

Group 5—Pyramidal Type. 25 ft. T4.

Golden foliage, specially attractive in winter.

TEXAS BLUE

T. or. texana glauca

Group 5—Pyramidal Type. 30 ft. T3

Strong open-growing type, blue-green color

	Height	Price per each for		
		Ea.	10	100
B&B	5-6 ft.	\$1.75	\$1.40	\$1.25
B&B	6-7 ft.	2.25	1.80	1.60
B&B	8-10 ft.	3.40	2.65	2.35
B&B	10-12 ft.	4.30	3.45	3.00

GRACEFUL

T. or. gracillimus

Group 3—Globe or Dwarf Type. 7 ft. T4.

Narrow with compact dark green foliage.

MINUTE

T. or. miniature

Group 3—Globe or Dwarf Type. 6 ft. T3.

Slow grower, dark green foliage.

The ball on our Trees doesn't crack nor crumble.

BONITA (Globe or Cone)

T. or. bonita

Group 2—Semi-spreading Type. 6 ft. T4.

Excellent for urns or tubs. Beautiful rich green color.

B&B	2-2½ ft.	\$1.00	\$.80	\$.70
B&B	2½-3 ft.	1.50	1.20	1.05

Heavy Perfect Specimens 25% Extra.

Pyramidal Arborvitae attain an air of superiority in the most choice plantings. These may vary in shadings from a dark green to a rich golden yellow.

Add a few to your plantings.

HUDGINS

T. or. hudsonii

Group 3—Globe or Dwarf Type. 8 ft. T3.

Compact, bluish-green feathery foliage. Branches close to ground.

ROSEDALE

T. or. rosdale

Group 3—Globe or Dwarf Type. 8 ft. T3.

Feathery bluish-green foliage; striking in appearance.

Height	Price per each for		
	Ea.	10	100
B&B 2½-3 ft.	\$.80	\$.65	\$.60
B&B 3 -3½ ft.	1.00	.80	.70
B&B 3½-4 ft.	1.25	.95	.80
B&B 4 -5 ft.	1.50	1.25	1.05

SHADOW

T. or. shadow

Group 5—Pyramidal Type. 12 ft. T3.

An excellent compact pyramidal, with rich yellowish-green shading.

B&B 3-4 ft.	\$1.15	\$.85	\$.75
B&B 4-5 ft.	1.50	1.25	1.05
B&B 5-6 ft.	1.95	1.55	1.35

Heavy Perfect Specimens 25% Extra.

Bhutan Cypress, Pyramid Arborvitae, Italian Cypress, Compact Green Arborvitae, and Spreading Juniper.

RAMSEY HYBRID

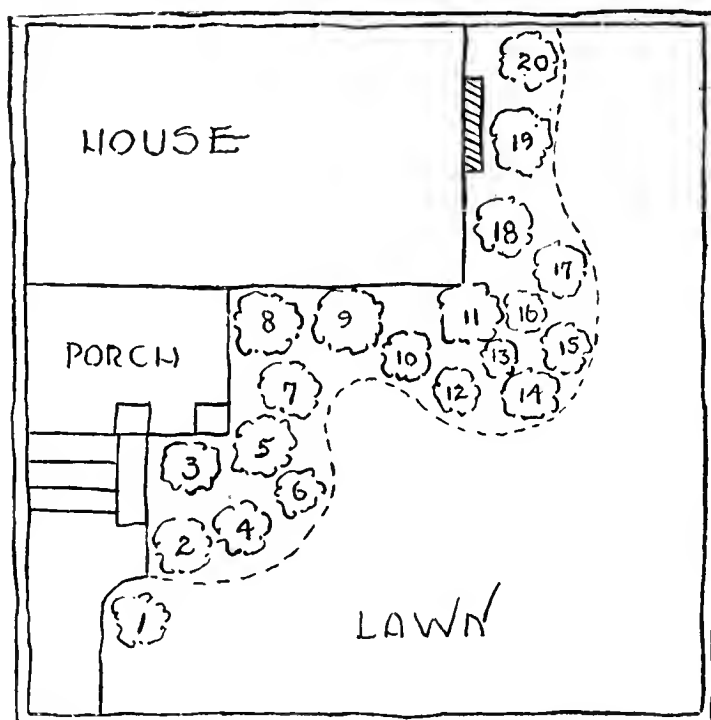

T. or. cupressifolia fastigiata

Group 6—Slender Type. 40 ft. T5.

Of pyramidal shape, broad at base, delicately tapering at top. Threadlike foliage, rich green color; compact grower, evenly branched. New growth has soft blue-shadings. Very hardy.

Height	Price per each for		
	Ea.	10	100
B&B 5-6 ft.	\$3.50	\$2.75	\$2.25
B&B 6-7 ft.	4.00	3.25	2.75
B&B 7-8 ft.	4.50	3.75	3.25
B&B 8-10 ft.	5.75	4.50	3.80
B&B 10-12 ft.	6.50	5.25	4.70
B&B 12-14 ft.	8.00	6.50	5.50

Heavy Perfect Specimens 25% Extra.

**SIKES**

T. or. sikesi

Group 6—Slender Type. 25 ft. T4.

Tall, fast growing, bright green with yellow shadings. Fills the columnar narrow planting places.

Height	Price per each for		
	Ea.	10	100
B&B 5-6 ft.	\$2.00	\$1.75	\$1.40
B&B 6-7 ft.	3.00	2.25	1.80
B&B 7-8 ft.	3.40	2.60	2.10
B&B 8-10 ft.	3.80	3.00	2.40

Heavy Perfect Specimens 25% Extra.**MAURINE**

T. or. maurineana

Group 6—Slender Type. 20 ft. T4.

Most outstanding slender tall green type.

ROENA

T. or. roenae

Group 5—Pyramid Type. 20 ft. T4.

Compact, dark green pyramid of good quality.

WINTERGREEN

T. or. Wintergreen

Group 5—Pyramidal Type. 20 ft. T4.

Where most varieties of the Chinese Arborvitae turn brown on one side after frost, this one retains its rich green color throughout the Winter.

YELLOW COLUMN

T. or. elegantissima

Group 4—Cone Type. 25 ft. T5.

Foliage yellow-green overcast with golden tips of yellow.

Height	Price per each for		
	Ea.	10	100
B&B 3-4 ft.	\$1.75	\$1.40	\$1.25
B&B 4-5 ft.	2.45	1.95	1.70
B&B 5-6 ft.	3.00	2.40	2.10
B&B 6-7 ft.	3.70	3.00	2.60
B&B 7-8 ft.	4.30	3.45	3.00

Heavy Perfect Specimens 25% Extra.**Testimonial from Oklahoma**

"During the last five years I have handled more than a hundred carloads from you. The balls, without exception were good. The root systems were well developed so the plant could recover quickly from the shock of transplanting. My family and I enjoyed the visit to your place, and we thank you for your hospitality."

GROUP WHERE CONIFERS PREDOMINATE

This group of Evergreens can be followed by Home Planters, which when planted will give an artistic effect. Use Tall Shrubs at corners, and in background; Medium tall next, with low Spreading varieties at edge of beds.

The illustration outlines the correct planting spaces for the tall and low growing Shrubs. This group for the Gulf Coast Planting may be followed according to sizes desired:

Key No.	Variety of Plants
1	Upright Privet (<i>Ligustrum lucidum erecta</i>)
4 & 7	Cannart Red Cedar (<i>J. vir. cannarti</i>)
10 & 20	Sylvester Juniper (<i>J. chi. sylvestris</i>)
8 & 19 & 15	Griffing's Waxleaf Privet (<i>L. lucidum compacta</i>)
9 & 18	Nandina Domestica (<i>Nandina</i>)
2	Pittosporum Tobira (<i>P. Tobira</i>)
3	Compact Myrtle (<i>Myrtus communis compacta</i>)
5 & 6 & 11 & 13 & 16 & 24	Pfitzer Juniper (<i>J. chi. pfitzeriana</i>)
21 & 23	Berckman's Golden Arborvitae (<i>T. or. aurea nana</i>)
22	Crinklyleaf Privet (<i>L. lucidum recurvifolium</i>)
12 & 17	Indian Azalea (<i>Azalea formosa</i>)
14	Glossy Abelia (<i>Abelia Grandiflora</i>)

CEDARS

Few trees are more permanent than the varieties of Cedars. They lend dignity to the garden, giving interest, variety and accent to the plantings unexcelled by any other Evergreen. The stately Cedars are indispensable for use in groups or specimen plantings.

CEDAR DEODAR

Cedrus deodara

Group 4—Cone Type. 50 ft. T3. Beautiful large growing Evergreen with broad base, slendering to a pointed tip. Foliage rich silvery-gray with gracefully weeping branches.

Height	Price per each for		
	Ea.	10	100
B&B 5-6 ft.	\$ 4.50	\$ 3.60	\$ 3.15

B&B 14-16 ft.	18.00	14.40	12.60
B&B 16-18 ft.	25.60	20.80	18.20

CYPRESS [Cupressus]

In this group, the Cypress stands at the head of its class in regard to hardiness, vigorous growth and its suitability for any place it is called to adorn. It is marvelous what effect can be produced with the graceful Cypress. One placed here, and another there, and the entire aspect of the home is changed.

HERE'S WHAT OUR CUSTOMERS THINK OF OUR B&B EVER-GREENS!

From Waxahachie, Texas: "Last winter I ordered two Royal Italian Cypress trees from you. I want to tell you they are just beautiful. They have grown a foot taller, keeping pace with one another, and when the weather dropped down to seventeen and went up to 102 they were not harmed. Neither did the cold and hot weather hurt the Bhutan Cypress I got from you".

ARIZONA C. arizonica
Group 4—Cone Type. 40 ft. T4. Beautiful blue or glaucous pyramidal tree; dense foliage.

BHUTAN C. torulosa majestica
Group 4—Cone Type. 20 ft. T3. Vigorous grower; dark green color with yellowish cast to new growth; foliage drooping or weeping.

Height	Price per each for		
	Ea.	10	100

JUNIPERS [Juniperus]

The Junipers comprise a large and varied group of small or dwarf trees, including trailing forms, which make a spreading mat of green on the grounds; wide-spreading, semi-prostrate varieties with horizontal branches; dwarf pyramidal or columnar forms and good sized trees. The Junipers are long lived, hardy, and of easy growth.

A well planned and planted lawn.

CANNART REDCEDAR J. vir. cannarti
Group 5—Pyramidal Type. 25 ft. T6.
The leading form of Redcedar, having deep rich green tufted foliage, keeping green all winter.

SCHOTTI REDCEDAR J. vir. schotti
Group 5—Pyramidal Type. 18 ft. T6.
Most attractive dark green tufted foliage, heavily branched and sturdy.

SILVER REDCEDAR J. virginiana glauca
Group 5—Pyramidal Type. 25 ft. T6.
Beautiful silvery-blue color. The richness of color and fine quality always commands high respect for its being used in choice plantings.

SYLVESTER J. chinensis femina
(Sylvestris or Japanese)
Group 4—Cone Type. 25 ft. T5.
Grows unique, sideling effect, sprangled upright habit; foliage rather light green, older foliage deeper, richer green; new tips light blue-green color. Very hardy; withstands drought and heat.

Height	Price per each for		
	Ea.	10	100
B&B 4- 5 ft.	\$ 4.50	\$ 3.60	\$ 3.15

FROM LOUISIANA: "I received the order of Fruit Trees in splendid condition, and I want to thank you for your prompt service and the good trees."

Field of Spreading Junipers

Spreading Junipers find a place in every planting, used to tie the taller Shrubbery to the ground line.

DWARF BLUE CHINESE

J. viridifolia nana compacta

Group 4—Cone Type. 8 ft. T5.

Medium height, with beautiful blue-green foliage.

JUNIPER No. 102

J. chinensis nana

Group 3—Globe or Dwarf Type. 8 ft. T4.

Low growing with scale-like leaves of light green.

JUNIPER No. 103

J. chinensis nana compacta

Group 3—Globe or Dwarf Type. 8 ft. T4.

Very irregular in outline; dark green, compact growth. Good selection and hardy.

WHITELEAF CHINESE

J. c. albovariegata

Group 5—Pyramidal Type. 8 ft. T4.

A new white tipped form, resembling growth of Spiny Greek in foliage, but has white or yellow spots interspersing the green.

Height	Price per each for		
	Ea.	10	100
B&B 2 -2½ ft.	\$2.50	\$2.00	\$1.75
B&B 2½-3 ft.	3.00	2.40	2.10
B&B 3 -3½ ft.	3.65	2.95	2.55

Heavy Perfect Specimens 25% Extra.

HILL'S PYRAMIDAL

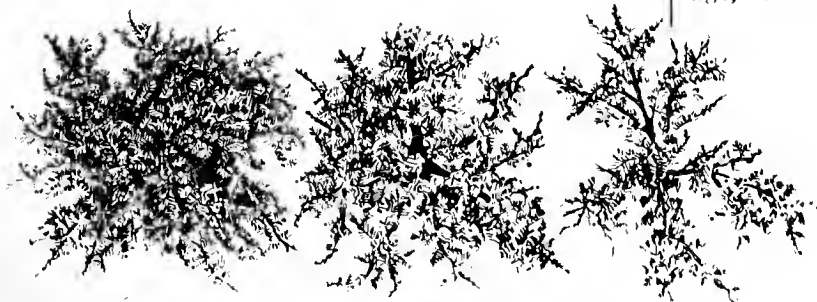

J. v. pyramidalis

Group 5—Pyramidal Type. 20 ft. T6.

Close-growing, rich green, retaining color all winter. Valuable for formal plantings.

Height	Price per each for		
	Ea.	10	100
B&B 3-4 ft.	\$3.30	\$2.65	\$2.35
B&B 4-5 ft.	4.50	3.60	3.15
B&B 5-6 ft.	5.85	4.65	4.05

Heavy Perfect Specimens 25% Extra.

Looking Down on Spreading Junipers

Illustrating full, well developed Shrubs. Left—Fully developed; Center—Fairly developed; Right—Young undeveloped size.

MASCULA

J. chinensis mascula

Group 5—Pyramidal Type. 16 ft. T4.

Holds dark green color all winter.

HILL DUNDEE (Black Hill) J. vir. pyramidalis hilli

Group 4—Cone Type. 10 ft. T6.

Medium height; deep rich green color; very hardy and desirable; tufted heavy foliage.

B&B 4-5 ft.	\$4.50	\$3.60	\$3.15
B&B 5-6 ft.	5.85	4.65	4.05
B&B 6-7 ft.	7.50	6.00	5.25

Heavy Perfect Specimens 25% Extra.

Hill's Dundee Juniper

FOUNTAIN

J. vir. tripartita

Group 1—Spreading Type. 6 ft. T6.

Very low-growing; dark green foliage with glaucous tips, branching irregularly.

PFITZER

J. chinensis pfitzeriana

Group 1—Spreading Type. 8 ft. T6.

Graceful, low-growing; blue-green plume-like foliage. It fits into the most aristocratic plantings. Does remarkably well in sun or full shade.

SAVIN

J. sabina

Group 1—Spreading Type. 6 ft. T6.

Main stem lies close to ground and lateral branches grow upward. Rich dark green coloring.

TAMARIX SAVIN

J. sabina tamariscifolia

Group 1—Spreading Type. 6 ft. T6.

Slow growing semi-erect, with dark green foliage, with needles thick set along branches.

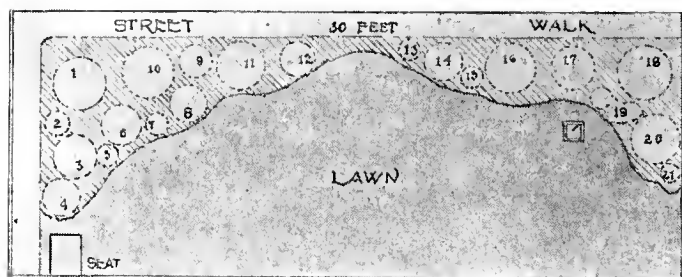

VON EHROH SAVIN

J. sabina von ehron

Very compact low form, branching and wide spreading.

Spread	Price per each for		
	Ea.	10	100

Pines (Pinus)

One of the most beautiful and permanent of Evergreens. Very Unique.

ITALIAN STONE

Pinus pinea

Group 2—Semi-spreading Type. 10 ft. T2.

Slow growing; deep green in mature trees, but young growth resembles Blue Spruce. Very attractive.

JAPANESE RED

Pinus densiflora

Group 2—Semi-spreading Type. 10 ft. T2.

Young branches yellow, covered with bloom, and with short slender green leaves.

Height		Price per each for		
		Ea.	10	100
B&B 2 -2½ ft.		\$2.20	\$1.75	\$1.50
B&B 2½-3 ft.		2.85	2.25	1.95

B&B 6 -7 ft.		7.50	6.00	5.25

Heavy Perfect Specimens 25% Extra.

Podocarpus

Of recent introduction. Grows equally well in sun or shade, and is not particular as to soils. Excellent for seaside plantings.

JAPANESE

Macki podocarpus

Group 5—Pyramidal Type. 18 ft. T1.

Slender medium size, with soft green foliage, bears blue-black berries. Long tapering leaves. Very striking.

MARCROPHYLLA

Nagi podocarpus

Group 5—Pyramidal Type. 18 ft. T1.

Similar to Macki except leaves broader, and more bushy.

Height	Price per each for		
	Ea.	10	100

Yaupon Holly. Cotoneaster, Nandina, Maurine Arborvitae, Pfitzer Juniper, Sikes Italian Cypress, and Azalea.

HEDGES

The Hedge is more than its own excuse for being; it justifies its existence in various ways. Around the small yard of a cottage or the formal terrace of a city house, the hedge can be trimmed and kept in scale with the size of the lawn. For decorative hedges, the Waxleaf Privet, Cape Jasmine, Abelia, Cherry Laurel, Yaupon and Boxwood are satisfactory. Crepe Myrtles can be used in limited amounts.

Yaupon Holly Hedge

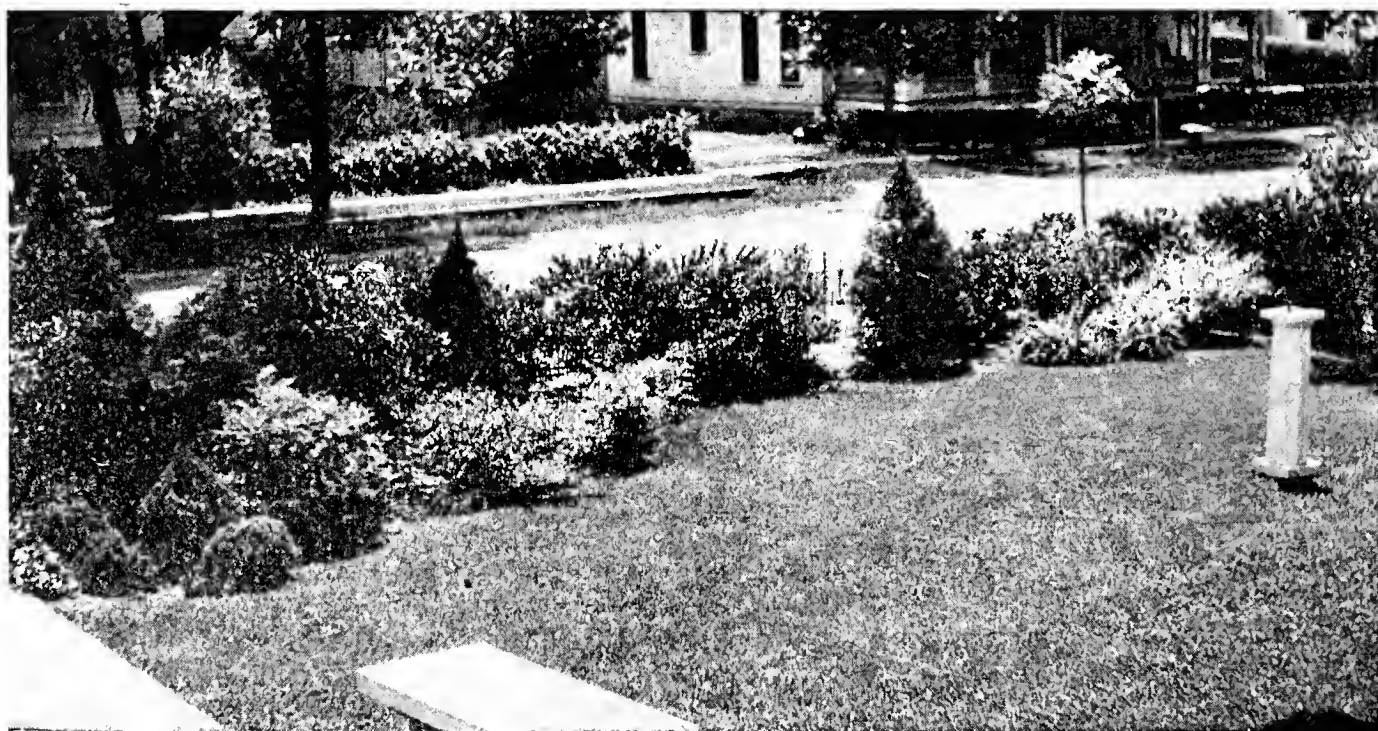

NEWER and BETTER HEDGES

While we are listing the varieties of plants used for Hedge purposes, we highly recommend the use of many other Broadleaf Evergreens.

Many Architects have made use of the Evergreen Yaupon Holly for Hedge purposes in the finer plantings, using Berried plants. Richness of color and fineness of texture of a hedge of this nature enriches any landscape planting immensely. (See page No. 16.)

Amur Privet Hedge

BROADLEAF EVERGREENS

Modern Home-Plantings cannot be considered as complete—or hardly begun—if they do not contain a liberal supply of Broadleaf Evergreens. They are needed for the green foliage which gives color all the year, especially in winter when warmth and color are demanded. There is need for them in all plantings, particularly in the Outdoor Living Room where they lay claim in everyday beauty.

We have an unusually large collection of Broadleaf Evergreens. The plants are frequently transplanted, carefully pruned, and given plenty of space to develop into stately, vigorous and healthy specimens.

Abelia

ABELIA GLOSSY *A. grandiflora*
Group 3—Globe or Dwarf Type. 6 ft. T5.

Small glossy evergreen leaves, with pinkish-white flowers in Spring and Summer. Hardy, thrifty growers.

Height	Price per each for		
	Ea.	10	100
B&B 18"-24 in.	\$.80	\$.65	\$.60

For Bushes Not Balled (NB) Deduct 25%!

Boxwood (Buxus)

COMMON *B. sempervirens*
Group 2—Semi-spreading Type. 4 ft. T5.

Rich, deep green foliage; compact dense growth.			
B&B 12-15 in.	\$1.00	\$.80	\$.60
B&B 15-18 in.	1.25	1.00	.80

Azalea

To get the best results, Azaleas should be planted in a slightly shaded location, and particular attention given to protecting them from the hot afternoon sun. The soil should contain an abundance of leaf-mold, peat and sand, and should be well-drained. Azaleas will not succeed in limestone soil. Mulching with decayed leaves, preferably those of hardwood trees, is a distinct advantage.

AZALEA FORMOSA *A. indica formosa*
Group 1—Spreading Type. 16 ft. T1.

Our test has shown this variety the most satisfactory for planting as an evergreen shrub. Has brilliant masses of purple-pink flowers in Early Spring.

Camellia

Camellias will grow in full sun if protected for the first few summers with a lattice frame; however an ideal planting place is where the plants will get only a half day's sun. Do not plant in full shade as they will not blossom as freely.

CAMELLIA JAPONICA C. japonica
Group 3—Globe or Dwarf Type. 16 ft. T1.
Exquisite waxy flowers never fail to draw admiration when they unfold during Winter months, all beautifully tinted. Plant is also handsome with compact dark evergreen foliage; very bushy. Offered in choice variety of colors.

Griffing's B&B Evergreens are Better!

Holly (Ilex)

The Holly family comprises a large and varied group. All varieties bear berries which color during the Fall and Winter and are very attractive. Extensively used for Christmas Decorations. Beautiful as individual plants, or when used in groups. We especially recommend the Yaupon for Hedges.

AMERICAN *Ilex opaca*
(Berry bearing or Pistillate)
Group 5—Pyramidal Type. 35 ft. T4.
Glossy, dark green spiny leaves.

DAHOON *Ilex cassine*
(Berry bearing or Pistillate)
Group 5—Pyramidal Type. 30 ft. T2.
Slender. Branches from ground. Small glossy dark green leaves. New variety and highly favored.

Robusta Palm.

PRIVETS
(Ligustrum)

The shrub is essential to Landscaping. The word "Ligustrum" refers to the entire family of Privets, which is by far the largest and best group of Broadleaf Evergreens. Varieties differ widely in size, shape, habit of growth, and color. With the addition of very few plants such as Conifers, Flowering Deciduous Shrubs and the Grasses, the Privets make a complete planting.

Fragrant white flowers are borne in spring, and black berries follow, remaining on the plants during winter, in medium and large clusters like wild grapes.

This group cannot be too extensively planted and is in such variety that can fill practically every need.

CRINKLEYLEAF *L. lucidum recurvifolium*
Group 4—Cone Type. 15 ft. T4.

A new variety of our own origination. Leaves medium size, pointed, very glossy and thick, distinctively twisted, making a most unusual effect. Fine for specimens or massing. The dark green color so desirable is had in this new variety. Growth is upright but very full.

Griffing's Waxleaf Ligustrums
B&B Sure to Grow.

BLACKLEAF *L. lucidum nigrafolium*
Group 4—Cone Type. 10 ft. T4

Leaves so dark as to appear almost black-green, thick and glossy. Medium spreading growth, and very hardy.

GRIFFING'S WAXLEAF *L. lucidum compacta*
Group 3—Globe or Dwarf Type. 8 ft. T3

The finest broadleaf evergreen grown for the Southland. This is our own origination. The leaves are very thick and waxy, the upper surface being highly glossed of dark green color, and the under side of much lighter shade. Ideal in form and development. Can be pruned and kept at height desired. Is used for hedges in every location, and as specimens; can be sheared into perfect forms. The Griffing Waxleaf grows in the shade or full sunlight.

Height	Price per each for		
	Ea.	10	100

While our prices are as low as any, yet our aim is not to be the cheapest; values our big consideration and aim.

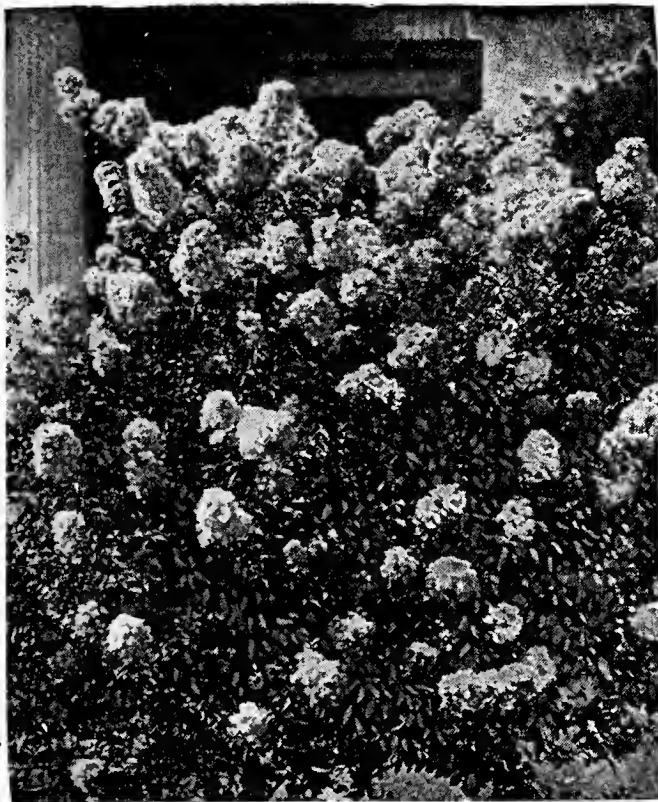

Plant Griffings B&B Trees and you will be insured of complete satisfaction.

DECIDUOUS SHRUBS

THE great majority of brilliant flowering shrubs and many other ornamental varieties **lose their foliage in winter** (Deciduous). For gorgeous color displays they should be promiscuously used in landscape plantings. Their winter **barren period is brief** in our Southern section and the color changes in autumn make the absence of leaves in winter **less lamented**. Usually flowering shrubs are best planted in groups of from 3 to 20 or more. They are far more effective in this way than planted singly. Put enough of one kind to **make a little picture** in the landscape **when in bloom** or when the leaves take on the autumn color, or the fruit and berries have ripened. **With enough evergreens** to keep the planting **cheerful in winter**, Deciduous shrubs should be generously used in the South.

Pruning should be done immediately after blooming season, cutting the fading blossoms away. Pruning too late or when dormant will sometimes interfere with blooming the following season.

Flowering shrubs can be handled when dormant with bare roots. Better results are usually had with B&B plants. For early or late planting and even mid-summer planting, B&B shrubs will grow luxuriantly. Try them and see what excellent results you obtain.

Griffing's Watermelon Red Crape Myrtle
"The most brilliant of them all"

Crape Myrtle (*Lagerstroemia Indica*)

Favorite flowering shrub of the South, hardy and heavy bloomer, it paints the Landscape in summer months with its brilliant blossoms in tones of crimson, red, pink, purple, and other shades. Frequently termed the "Lilac of the South". Combinations of crape myrtle colors make the most exquisite effects obtainable.

GRIFFING'S WATERMELON RED L. i. rubra
Group 5—Pyramidal Type. 10 ft. T3.

Large fluffy flower heads. Rich clear bright red. Most gorgeous of all colors.

IMPERIAL PINK L. i. rosea
Group 5—Pyramidal Type. 10 ft. T3.

Light pastel shade. Large clusters of flowers. Upright grower.

MAGENTA L. i. magenta
Group 5—Pyramidal Type. 16 ft. T4.
A new purplish-pink shading. Very striking.

PURPLE L. i. purpurea
Group 5—Pyramidal Type. 20 ft. T5.
The rich bright color most desirable. Not the faded-out type.

PALMS

Nothing makes our Southern towns more invitingly tropical, especially in the eyes of our Northern visitors, than the Palms, at home in our mild climate.

Lofty Palms lining an avenue suggest stability and dignity. A careless grouping of Palms and other evergreens makes an effect of luxuriance that nothing else can create.

Pindo Palm (*Cocos australis*) Very hardy, Silvery gray foliage

Pindo*Cocos australis*

20 ft. T2. Very hardy. Silvery-gray leaves with pronounced curve. Delicious fruit.

Very graceful, with upright recurving leaves, resembling the *Canariensis* or Date Palm leaves. Foliage is of an impressive gray green; fruit edible; erect columnar trunk. A great deal harder than the Phoenix and Washington and can therefore be planted farther North than any outdoor variety.

Palms Growing in the Nursery Rows

VINES

Do not allow your vines to cover entirely a well designed doorway or window. Let them frame the good features of the house and cover its architectural defects. Training or trimming should be shrewdly done to keep the naturalistic effect, which vines give to plantings.

FIELD GROWN VINES

Beautiful, artistic vines quickly make beauty spots of each nook and corner, hide all unsightly views, and surround the home with colorful fragrant blossoms.

Barren walls hidden with green vines

- CAROLINA JESSAMINE** *Gelsemium sempervirens*
T2. Evergreen native climber; golden yellow blossoms in Early Spring.
- HALL'S HONEYSUCKLE** *Lonicera jap. halliana*
T5. Evergreen vine, very fragrant yellowish-white flowers.
- TRUMPET CREEPER** *Bignonia radicans*
T3. Evergreen vine with orange-red flowers in profusion, in Spring.
- VIRGINIA CREEPER** *Ampelopsis quinquefolia*
T2. Large green leaves, changing to brilliant scarlet in Fall.

- WISTERIA PURPLE** *Wisteria sinensis*
T5. Cutting grown. Prolific grower. Long slender racemes lavender flowers.
- SCARLET TRUMPET** *Lonicera sempervirens*
T2. (Woodbine Vine) Very attractive red flowers similar to Honeysuckle.

BAMBOOS and GRASSES

Dense, plume-like foliage is entirely evergreen. Certain varieties make beautiful screens for hiding garages, and outbuildings and obstructing unsightly views. Does not spread like reeds or Johnson Grass.

FEATHER BAMBOO *Bambusa vulgaris*
15 ft. T2. Large, graceful; green foliage and stems.

GOLDEN BAMBOO *B. vulgaris aureovariegata*
15 ft. T2. Stems golden, penciled green. Very pretty.

NINGALA BAMBOO *Arundinaria falcata*
10 ft. T2. Low growing, graceful arching branches. Finely divided.

SILVERSTRIPE BAMBOO *B. a. viridistriata*
15 ft. T2. Silver or white stripe in leaf; otherwise like Feathery variety.

FOUNTAIN GRASS *Pennisetum ruppelii*
2 ft. T3. Airy light colored foliage. Almost evergreen.

PAMPAS GRASS *Cortaderia argentea*
8 ft. T2. Beautiful light green foliage, gracefully recurved. Sends up tall silvery plumes which are distinctive.

STRIPED EULALIA GRASS *E. japonica* var.
3 ft. T5. Has white pin stripes lengthwise of the blades. Very striking.

ZEBRA GRASS *Miscanthus sinensis zebrinus*
5 ft. T4. Has white bars cross-wise of the blades

SHADE and ORNAMENTAL TREES

(Suitable for Shade and Street Planting)

Shade Trees are a necessity and comfort as well as an adornment for the Home and Parkways. The sun is hot in the South, and Shade Trees add comfort to the home plantings. We make a specialty of growing desirable Shade trees, and offer the vast assortment as listed below. Make your selection to fit your requirements. Home Sites where Trees are planted are always most desirable, therefore all new Home Sites should be planted early.

Chinese Tallow

ARIZONA ASH *Fraxinus velutina*
30 ft. T2. (Evergreen Ash). Clean growth, trunk straight with grayish-color smooth bark. Dark glossy green foliage. Practically evergreen.

AMERICAN ELM *Ulmus americana*
80 ft. T6. Attractive shade for arid regions. Small leaves, small weeping branches. Picturesque.

CHINESE ELM *Ulmus parvifolia*
50 ft. T5. Similar to American, except slower in attaining shaped head for shades.

CHINESE TALLOW *Sapium sebiferum*
50 ft. T2. Compact upright dense fast growing semi-tropic tree with small bright green leaves, assuming striking scarlet in fall.

SYCAMORE *Platanus orientalis*
80 ft. T5. (Plane Tree). Deciduous. Large tree, large leaves shed in Fall.

CHINESE POPLAR *Populus lasiocarpa*
40 ft. T5. Tall pyramidal form. Dark green foliage, rounded shape.

LOMBARDY POPLAR *Populus nigra italica*
40 ft. T6. Slender. Popular for lining drive-ways. Sturdy growth.

Live Oak Tree in 1924—which today spreads over 125 feet

FRUITS and NUTS

During the past two or three years there has been a growing tendency to plant Fruit and Nut Trees, and Berry Vines for home use, as well as commercial use, just as there has been a movement for each person to have his own vegetable garden.

It is surprising the results that can be obtained from a small investment in Fruit and Nut Trees and Berry Vines. A few trees planted in your backyard will furnish plenty fruit for home use. Consult us if you are planning to plant an orchard on the small or larger scale.

PECANS

(Hicoria pecan)

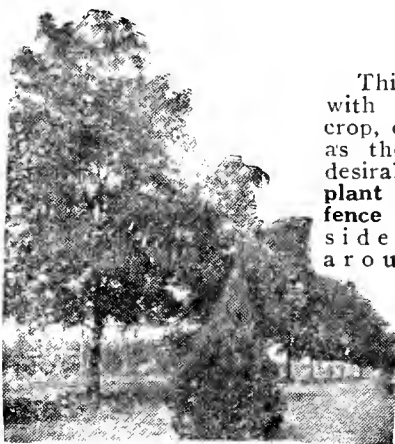

Governor Hogg of Texas selected this tree to mark his grave.

If you want the best results, it is imperative that you fertilize, spray, and cultivate your trees well. On good land, Pecans should be planted 60x60 ft., or 12 trees per acre; on thin land, 50x50 ft. or 18 trees per acre.

For experience we find it best to plant as many as 4 varieties in each orchard. Each gets the benefit of pollinization of other varieties. Also, should one variety fail to bear, the crop will not be cut off entirely in any one year.

Trees should be planted at a distance of 45x60 feet apart, requiring 18 trees per acre. At this distance other crops may be successfully and profitably cultivated between the rows of pecans without detriment or injury to the trees. The cultivation of other crops actually benefits the pecan trees and reduces the expense of upkeep to a minimum. We recommend the cultivation of corn, cotton and vegetable crops between the rows.

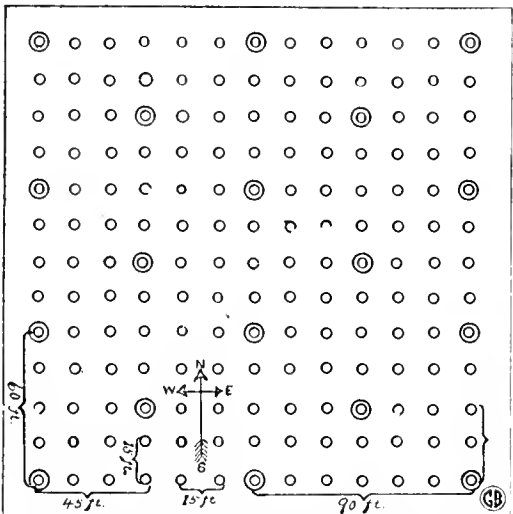

THE PECAN IS AN EXCELLENT SHADE TREE

This, together with its valuable crop, commends it as the one most desirable tree to plant along your fence lines, roadsides, in and around your barnyard, hog lots and garden in addition to solid plantings of orchards.

Pecans for Home Planting.

A sure, safe and substantial income for the young or middle-aged man or woman can be more quickly established in pecan growing than any other business in which they may engage.

⊗ Pecan—Diagonally planted, 45 to 90 ft.
○ Peach, Plum, Orange, Fig, Kumquat,
Interplanted 15 ft. squares.

Special Varieties of Pecans

Special Griffing and Odom Varieties of Certified Pecan Trees, certified by Texas Dept. of Agriculture. These four varieties have special outstanding advantages over other Paper Shell Pecans as they have proven to be scabproof, uniform, regular bearers.

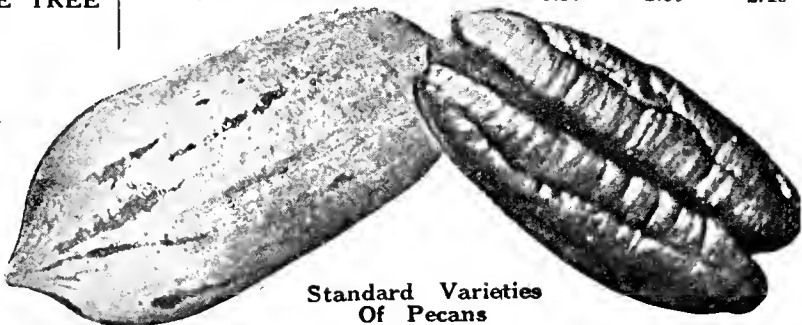

BRADLEY Originated by Griffing Bros. A Prize Winner. Very rich. Shell thin. Bears early and very prolific. T1.

BIG "Z" Originated by Mr. Zink of Miss., but Griffings are exclusive propagators. Average 38 to 40 lb. Thin shell; fine appearance. Kernel rich, crisp, fine flavor. Prolific. T2.

ODOM Originated by R. L. Odom, Jasper, Texas. Extra thin shell. Kernel light, crisp and very rich. Excellent flavor.

SABINE Originated by R. L. Odom, Jasper, Texas. Long, tapering, large nut. Fills well. Heavy uniform crop. 40 to 42 to lb. Prolific bearer.

Young Fig Tree with Fruit

Fig (Ficus carica)

Figs thrive in all portions of the South. Trees are seen growing in Door-yards, chicken runs, and near buildings in a most luxuriant manner, producing enormous crops. Commercial Fig growing is gradually extending throughout the South.

- BROWN TURKEY** Medium to large. Yellowish brown fruit. Thin skin. T2.
BRUNSWICK Large; purplish-black. Early bearer. T2
CELESTE (Celestial) or "Little Sugar Fig". Sweetest of all. T3.
GREEN ISCHIA Light transparent green. Pink flesh. Very late. T2.
MAGNOLIA Light colored; prolific. Excellent for preserving. T1.

Grapes (Vitis)

Bunch Varieties

Not all bunch grapes are at home in the South, but many grow here to perfection. Best trellis is Munson trellis—posts with cross-bars at top with three wires strung over tops for vine support. Plant 8 to 10 ft. apart. Should be pruned each Winter.

- CARMAN** Medium size, black, firm and tender; fine quality. Prolific bearer. T4.
CONCORD An old favorite. Very large, round, bluish-black. Sweet. Early. T5.
NIAGARA Similar to concord in texture, except pale greenish-yellow. Tender, juicy and sweet. July. T5.

Muscadine Varieties

Native to the South. Known for excellent flavor. Do best when trained on over-head arbors. Not usually pruned.

- JAMES** Very large; purplish-black. Rich, juicy and sweet. T3.
THOMAS Medium size; red. Small cluster. Very fine quality. T3.
MALE MUSCADINE Pollinating variety. Should be planted with other varieties for heavier crops. T4.
WHITE SCUPPERNON Large, bronze color. Sweet and vinous. Very prolific. T2.

NB 3-4 ft.	.60	.50	.40
NB 4-5 ft.	.80	.60	.50

Mulberry (Morus)

HICKS EVERBEARING Heavy bearing. Berries black. T5.

BLACK ENGLISH AMERICAN Large leaves. Berries large and black. T4.

NB 5-6 ft.	.60	.40	.30
NB 6-8 ft.	.80	.50	.40

Mulberry Fruit

Blackberries

DALLAS Large; fine quality. Early to mid-season. T4.

MC DONALD Cross between dewberry and blackberry. Fine bearer; requires planting with pollinization variety. Recommend Haupt. Ripens May 1st. T5.

HAUPT Never fails to bear full crop of large, sweet, luscious berries. T5.

	Price per 25	100	1000
Rooted Cuttings	\$1.00	\$3.50	\$22.50

Dewberries

AUSTIN-MAYS May and June. Prolific bearer. Robust grower. Sure crop. Fruit very large; fine quality. T4.

THORNLESS Claimed to be as good as Austin-Mays, but without Thorns. T3.

	Prices per 25	100	1000
Rooted Cuttings	\$1.00	\$3.50	\$22.50

Youngberry

Berries about an inch long; purple color. Fine flavor, similar to raspberry. Vines robust, from 10 to 20 ft. long in season. Very hardy. Season is in June after Strawberry Crop. Best results obtained by planting 6 to 7 ft. apart in rows, with rows 8 ft. apart. A Two-wire trellis 4 ft. high best for successful cultivation. T5.

	Prices per 25	100	1000
Rooted Cuttings	\$3.00	\$6.75	\$30.00

CITRUS FRUIT

Citrus Trees should be low branched and dirt banked among limbs during Winter months.

Our low branched trees are sold according to Caliper—size just above bud. All Citrus budded on Citrus Trifoliata Root Stock.

Mr. Griffing admiring one of his Fruiting Satsuma Orange trees. (with 2000 Oranges)

Kumquat

(Fortunella japonica)

MEIWA New variety introduced from China. Fruit large, nearly round; deep yellow. Sweet and delicious. Productive. Bears early. Good for jellies, marmalades, etc.
